DE~FENDS™ Antibacterial Foam Hand Soap, with the active ingredient triclosan, produces a rich, luxurious foam that is kind to the skin and kills germs.

ECONOMICAL – Each 1,000 mL cartridge will yield as many hand washings as up to 3 similar sized containers of traditional hand soap.

SKIN “FRIENDLY” – Premium, rich foam is gentle on skin and users are more likely to maintain good hygiene

CLEAN & SAFE – Replaceable cartridges are manufactured of rugged plastic – no flimsy baggies that can rupture and leak. Also, each cartridge comes complete with a new foam nozzle already inserted, to insure a consistent delivery of soap without clogging or dripping.

SIMPLE TO USE – Open the locking safety cover and just “snap” in a fresh new cartridge.

PROPER USE

DE~FENDS™ Antibacterial Foam Hand Soap is a premium hand & skin care product. Simply apply 1-2 pumps of the rich lather to your hands, rub in to the skin and rinse with clean water. Used as directed, **DE~FENDS™** will reduce the bacterial count on skin by at least 99.9% and leave skin feeling smooth and refreshed.
