ENDEW™ is a highly concentrated, ready-to-use liquid fabric **Sanitizer & Mildewcide.**

When used in the final rinse, ENDEW™ will impart a **Self-Sanitizing** finish to fabric. ENDEW™ **inhibits the growth of mildew, molds and fungi** for a minimum of 30 days.

Used on a regular basis, ENDEW™ prolongs textile life by reducing discoloration and tensile strength loss caused by mildew growth and by harsh stain-removal formulas. Colored garments no longer have to be “ragged out” due to mildew discoloration that cannot be bleached.

- ⇒ **Reduces Mold/fungus count by minimum 99.9%**
- ⇒ **Kills odor-causing bacteria**
- ⇒ **Prevents discoloration and “pin-holing”**
- ⇒ **Prolongs the useful life of all textiles**
- ⇒ **Great for table linens, napkins, aprons, bedding, blankets & uniforms**
- ⇒ **Keeps working for 30 days or more**

** ENDEW™ is a naturally plant derived didecyldimethyl ammonium chloride manufactured from 91% naturally bio-renewable plant derived feedstock, REACH Pre-registered, BPD Notified and EcoLogo Certified for use in Canada.*
