BACSTOP™ XL is a highly concentrated liquid fabric **sanitizer** designed for large commercial machines and tunnel washers. Used in the final rinse, **BACSTOP™ XL** leaves behind a finish that is both self-sanitizing and bacteriostatic. Under conditions of contamination, **BACSTOP™ XL** continually eliminates 99.9% of infectious bacteria. Unlike bleach – which stops working after textiles are removed from the wash-wheel - **BACSTOP™ XL** remains active on textile surface, continuing to aid in the prevention of cross-contamination from both Gram Negative and Gram Positive bacteria, such as;

- ⇒ *Corynebacterium ammoniagenes*
- ⇒ *Escherichia coli* O157:H7 [*E. coli* O157:H7]
- ⇒ *Klebsiella pneumoniae*
- ⇒ *Listeria monocytogenes*
- ⇒ *Salmonella enterica* [*Salmonella*]
- ⇒ *Staphylococcus aureus* [*Staph*]
- ⇒ *Staphylococcus aureus* – Community Associated Methicillin-Resistant [**CA-MRSA**]
- ⇒ *Staphylococcus aureus* – Hospital Associated Methicillin resistant [**HA-MRSA**]

BACSTOP™

Textiles treated with **BACSTOP™** in the wash, retain an ACTIVE ANTIMICROBIAL finish, killing newly acquired bacteria with a ZONE OF INHIBITION

Infectious Bacteria

Treated Fabric

Zone of Inhibition

MANY APPLICATIONS:

- Sheets, bedding, pads & comforters
- Scrubs, gowns & uniforms
- Drapes, curtains & room dividers
- Towels
- Athletic wear & uniforms

PERFECT FOR:

- Healthcare
- Nursing Homes
- Schools
- Sports teams
- Health clubs
- Day Care
- Correctional Facilities
- Military Housing
